## SUMMARY

Computer Science postgraduate with a strong foundation in programming, data structures, databases, web technologies, and software development, along with experience teaching Computer Science and Application. Proficient in Python, Java, C, SQL, HTML, CSS, and JavaScript. Strong in problem-solving, communication, and explaining technical concepts clearly, with a keen interest in both IT and academic roles.

## EDUCATION

|                                                                                                                         |                                           |

## THEORETICAL KNOWLEDGE

Programming Language with C, Digital Logic Circuit, Data Structure and Algorithms, Computer Architecture, Numerical Analysis, Graph Theory, Operating System, Computer Graphics, Computer Networking, Microprocessor 8085, Electronic Commerce, Object Oriented Programming, Programming Language with Java and Python, Database Management System, Advanced Java, Automata and Compiler Design, Computer Software Development, Computer Multimedia, Cryptography and Network Security, Artificial Intelligence and Machine Learning, Data Science, Computer Image Processing, Cloud Computing.

## TECHNICAL SKILLS

|                               |                                                                            |
|-------------------------------|----------------------------------------------------------------------------|
| <b>Languages:</b>             | Java, Python, JavaScript, PHP, C, Shell Script/Bash                        |
| <b>Frontend:</b>              | React.js, HTML5, CSS3, Tailwind CSS                                        |
| <b>Backend:</b>               | Node.js, RESTful APIs, Microservices, OAuth 2.0, JWT                       |
| <b>Database &amp; Cloud:</b>  | MySQL, PostgreSQL, MongoDB, AWS                                            |
| <b>DevOps &amp; Tools:</b>    | Git, GitHub, Docker, Kubernetes, CI/CD (GitHub Actions), Linux             |
| <b>Core CS &amp; Process:</b> | OOP, Data Structures & Algorithms, System Design, SDLC, Unit Testing, Jest |
| <b>AI/ML:</b>                 | LangChain, PyTorch Geometric, Scikit-learn, Transformer Models, NLP        |

## WORKING EXPERIENCE

|                                                                                                                                                                                      |                            |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------|
| <b>Private Tutor — Computer Science &amp; Application</b><br><i>Self-Employed</i>                                                                                                    | <b>June 2022 – Present</b> |
| <ul style="list-style-type: none"><li>Five years of experience in teaching Computer Science &amp; Application with familiarity across different educational board syllabi.</li></ul> |                            |
| <b>Guest Teacher — Computer Science &amp; Application</b><br><i>Microchip Institution</i>                                                                                            | <b>June 2025 – Present</b> |
| <ul style="list-style-type: none"><li>Teaching Class 11 (Semesters 1 &amp; 2) and Class 12 (Semesters 3 &amp; 4) under WBCHSE.</li></ul>                                             |                            |

| <ul style="list-style-type: none"><li>AI-based repository analysis platform using Python, FastAPI, React.js, LangChain, and ChromaDB to provide architecture analysis, code navigation, bug investigation, documentation generation, and repository-aware chat using RAG and LLMs.</li></ul>                                               |                               |

## CERTIFICATIONS & ACHIEVEMENTS

- Introduction to Generative AI — Certified in fundamental concepts and applications of Generative AI, issued by Simplilearn SkillUp, August 2026.
- Introduction to Cyber Security — Certified in fundamental concepts and applications of Cyber Security, issued by Simplilearn SkillUp, August 2026.
- Alpha (DSA with Java) — Successfully completed the Data Structures and Algorithms with Java course, issued by Apna College, certified by Shradha Khapra (Co-Founder).
- Tailwind CSS: Style Apps Like a Design Guru — DevTown × Google Developer Groups – VIT-AP | July 2025
- DBMS and SQL MASTERY — DevTown × microsoft student chapter – GNIT | August 2026
